

What is claimed is:

- 1 -

5 A storage device for holding articles within a hat, said device comprising a wallet adapted to be removably attached to the inside of said hat by means of at least one boning member in a pressure fit.

- 2 -

10 A device according to Claim 1 wherein said hat is a baseball hat.

- 3 -

15 A hat storage device according to Claim 1 comprising:
a cross boning member;
a forward boning member extending at one end from said cross
boning member, to a securing member at another end, and
a wallet supported by a first wallet support boning member, a
second wallet support boning member, said cross boning member, and
said forward boning member, and
20 wherein said hat storage device is adapted for removable
attachment to the inside of a hat to be held therein by pressure fit when
said securing member and said cross boning member are inserted into
an internal folded band of said hat.

- 4 -

25 A hat storage device according to Claim 3 wherein said wallet is covered by a material attached to said cross boning member, said first and second wallet support boning members, said forward boning member, and a wallet closure boning member, attached at one end thereof to said first wallet support boning member and at another end
30 thereof to said second wallet support boning member.

- 5 -

5 A hat storage device according to Claim 4 having a pull tab
attached to said wallet closure boning member for opening said wallet.

- 6 -

10 A hat storage device according to Claim 5 wherein said material is
a netting material.

- 7 -

15 A hat storage device according to Claim 6 further including a
pouch pocket within said wallet.

- 8 -

20 A hat storage device according to Claim 5 further including a side
pouch attached on a side of said hat storage device for additional
storage.

- 9 -

25 A hat storage device according to Claim 8 wherein said side
pouch is attached to said hat storage device by inserting said cross
boning member through a sleeve in said side pouch.

- 10 -

30 A hat storage device according to Claim 9 wherein said side
pouch includes a pull tab for opening and closing said side pouch.

- 11 -

5 A hat storage device according to Claim 10 wherein said side pouch is oriented so that said pull tab will be inside of an internal folded band on said hat when said hat storage device is attached to said hat.

- 12 -

10 A hat storage device according to Claim 1 comprising:
a cross boning member;
a forward boning member extending at one end from said cross boning member, to a surrounding boning member at another end, and
a wallet supported by a first wallet support boning member, a second
15 wallet support boning member, said cross boning member, and said forward boning member, and
wherein said hat storage device is adapted for removable attachment to the inside of a hat to be held therein by pressure fit when said surrounding boning member and said cross boning member are
20 inserted into an internal folded band of said hat.

- 13 -

A hat storage device comprising:
a cross boning member;
25 a forward boning member extending from the cross boning member at one end to a securing boning member at another end, and
and
A hat storage device comprising:
a cross boning member;
30 a forward boning member extending at one end from said cross boning member, to a securing member at another end, and

a wallet supported by a first wallet support boning member, a second wallet support boning member, said cross boning member, and said forward boning member, and

wherein said hat storage device is adapted for removable
5 attachment to the inside of a hat to be held therein by pressure fit when said securing member and said cross boning member are inserted into an internal folded band of said hat.
